

Health Rights MA is a non-profit 501c4 dedicated to protecting the health rights of the citizens of MA through proactive legislative efforts. We are a volunteer run grassroots group and we need the help of every health freedom loving citizen of MA. We will hold our lawmakers accountable. We will put and keep the pressure on.

Health Rights MA filed 2 bills in the legislature S.1122 and H.4151 in February of 2021 that will protect your fundamental right to make your own health care decisions. We must use these bills to put the pressure on the legislators to do the right thing - Not only must they protect our rights against these medical mandates but they must pass laws that will protect these rights for future generations.
