# About This Voter Guide

While we did not have the manpower to create a proper voter guide to include all the candidates running for state office this November, we did reach out to several candidates and some reached out to us.

Listed are the candidates that sent their Health Rights Candidate Legislative surveys back and got an A rating.

In addition, we have a list of incumbent lawmakers who have a proven track record of supporting health freedom.

This is not an exhaustive list. If you do not see your candidate please reach out to them directly!

**It's not too late to share our survey with your candidates! It can be downloaded here.**
