## Excess Deaths 2021-2023

2020 was a year of greater excess respiratory deaths, while 2021 and thereafter were years of greater clotting and hemorrhaging excess deaths.

Since diseases do not change how they kill on a year boundary, something other than COVID began killing people through blood and immune-related disorders in January 2021, when COVID “vaccines” were introduced. -John Beaudoin Sr.
